1200+ news articles on the consequences of burning woody biomass.

EDSP ECO contribution for the PBL's research into the availability of sustainable biomass and its application possibilities in the Netherlands.

2020 MARCH 16

EDSP ECO is a research and project agency and creates an environment to support organizations worldwide that are responsible for actions to protect the planet, end poverty or increase well-being. We provide support in the form of building and managing websites, conducting extensive research, setting up and offering digital campaigns, connecting stakeholders, giving public speeches and interviews and developing and deploying environmentally friendly solutions. In addition, we actively focus on politicians and companies that contribute to pollution and climate change.
