

Benchmarking and guidelines for streamlined authorisation processes for bioenergy installation WORKGROUPS

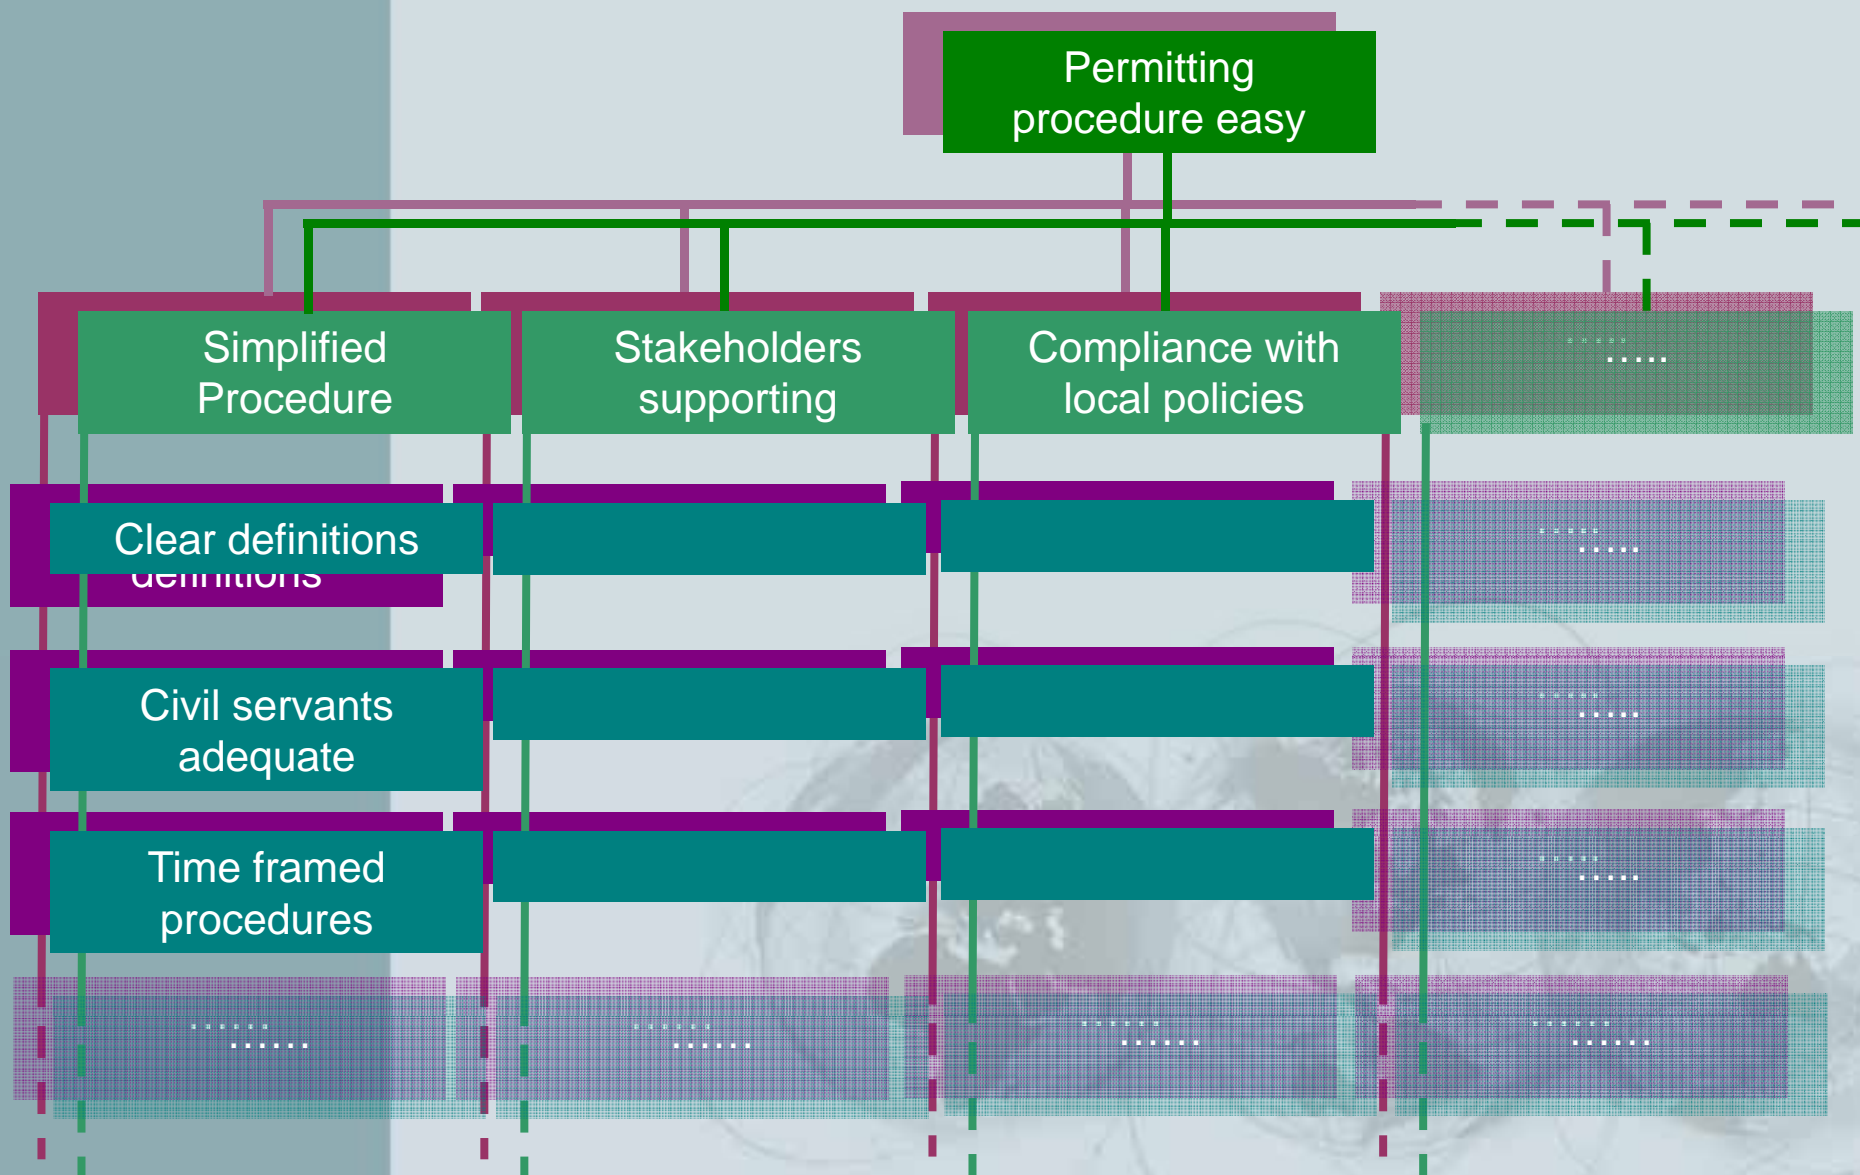

Workgroup Logical Framework

	MEANING “Which is the question to be answered”
GOAL	What issue or problem is the workshop trying to address?
PURPOSE	What final result is the workshop trying to achieve?
OUTPUTS	What are the particular outputs needed to achieve the <i>Purpose</i> of the workshop?
ACTIVITIES	List the activities which are needed to achieve these outputs.
INPUTS	Provide additional information, such as the inputs which are needed to carry out these activities.

Phase1-Problem identification

Phase 2-Solutions

Phase 3-Actions

Permitting
procedure easy

Simplified
Procedure

Clear definitions

Action required	By Whom	Assumptions	Monitoring
Guidelines on definitions of feedstocks/biomass waste	The European Commission	Effective implementation by Member States	n. of laws adopting revised definitions

How to proceed

Phase 1 – Group discussion

Identification of the problems

Selection of achievable issues

Coffee break

Phase 2 and 3 – Group discussion

For achievable issues: identification of solutions and definition of actions

Final session

Wrap-up

Thank you
