

The background of the page is a large photograph of a lush green landscape. In the foreground, there is tall grass. In the middle ground, a green truck is parked on a dirt path. The background shows rolling hills and mountains under a clear sky. The text 'FOREST PROJECT DEVELOPMENT' is overlaid on the left side of the image in a large, white, bold, sans-serif font.

FOREST PROJECT DEVELOPMENT

To successfully implement a forest restoration project requires careful preparation and planning. Face the Future can offer support in the preparatory work, implementation,

...tions of your project.

...ant it is to involve other stakeholders in the project. We can advise you on evaluating the benefits and costs of a project, the impacts, and information on mitigation measures. We identify the major social and economic factors involved in reforestation, such as employment, water services, CO2 capture and storage, and climate regulation.

We would be glad to assist you in devising an operational plan, forestry management plans, monitoring plans and GIS [Geographic Information System] applications.

CLIENTS ABOUT FACE THE FUTURE

Martijn Boosten, Probos

“Face the Future is the only party I know that knows how the CO2 market works through and through. And also has experience with it in both the Netherlands and the tropics. Face is an expert partner and the advice I receive is strongly substantiated and solid. At Face you get value for money.”
